- 12 Adventure Zoological Park
- A had to compete with another zoo
 - B was the largest private zoo at the time
 - C became more and more popular after its construction

They aimed to transform the site into a popular tourist attraction and started to construct Adventure Zoological Park. Unfortunately, another zoo, Wild Central Zoo, was opened at approximately the same time and subsequently became the largest private zoo at the time. Due to the fierce competition and declining attendance numbers, New Adventure Company appointed Christopher Wilson as the General Manager to revitalize the zoo in 1989.

- 13 In 1998, Adventure Valley
- A adopted a pay-per-ride structure
 - B had 3 times as many visitors as that in 1993
 - C promoted Christopher Wilson to be the Chief Executive Officer

The whole site was renamed as Adventure Valley in 1993 and adopted a pay-once-and-enjoy-all price structure, different from the pay-per-ride structure adopted by theme parks in the same area. The theme park was proven to be a phenomenal success, where admission number tripled from 1993 to 1998. In 2000, Christopher became the Chief Executive Officer of New Adventure Company Limited and decided to eliminate the zoo and transform the entire site into a pure theme park.

- 23** How will Sammy and Brian illustrate the habitats of sundews?
- A** with a video clip showing sundews in different habitats
 - B** with a map highlighting the highly populated regions
 - C** with labelled pictures of different species

Maybe we could show a video clip of different types of sundews growing in various habitats? But that might be a bit too time-consuming. Or we could have a diagram, like a pinned map showing the most populated regions?

Or we could just show the pictures of different species, then mark the habitats beneath them? No, let's go with your last suggestion.

陷阱：一半正確，一般錯誤

- 15** After visiting the theme park, the group will stay
- A** at a hotel with spa service
 - B** in the special guest room where they could view animals
 - C** near the theme park

In 2014, the park opened Explorer Hotel right next to the theme park. Another hotel, Renaissance Hotel and Spa, was opened in 2019 further away from the theme park, catering to guests who prefer a more relaxing experience. We are going to stay at the former hotel tonight, where you would be able to view animals from the hotel room.

- 22** According to Sammy and Brian, where do sundews grow in?
- A** Australia and North America
 - B** Humid and sunny areas
 - C** Acidic and dry soil

Around 50% of all known species could be found in Australia, while more than 40 species could be found in South America and Southern Africa.

Yes, sundews generally grow in moist habitats with acidic soils and high levels of sunlight.

- 25** What is special about the carnivory mechanism of sundews?
- A** The mucus is sweet but not sticky.
 - B** The process of killing insects is efficient.
 - C** Nutrients are directly absorbed by the whole plant.

No problem at all. The stalked glands secrete sweet mucus to attract insects. Upon touching the plant, insects become entrapped by sticky mucus and are quickly engulfed by the tentacles.
